ASTANA IT UNIVERSITY · School of Digital Public Administration

Assignment 4 Appendix: Week 8 Financial Discrepancy Audit, Week 9 Career Capability Matrix & Evidence Folder

Student: Manat Amir (ID: 261434) | Group: DPA-2602 | Course: BA 1204 / BA2026 (2026–2027)
Focal Enterprise (Company B): AB Auto (Astana, 4 IPs, 3% Tax Regime) | Comparator (Company A): Interkom-Auto (TOO, 12% VAT)

1. Week 8 Financial Position & Verified Ratio Summary (AB Auto, FY 2026)

Table A1. *Verified Management Accounting Inputs (AB Auto Consolidated 4-IP Operational Perimeter, 2026)*

Financial Line Item	Verified Amount	Primary Source & Verification Method
Annual Net Sales (Revenue)	**384.00M KZT**	Audited 1C / ABPos multi-hub register totals across 4 IPs under Art. 683 statutory limits [3], [5].
Annual Net Profit	**26.88M KZT**	Net earnings after COGS, warehouse/counter operating expenses, Kaspi fees, and 3% simplified tax [3], [5].
Total Current Assets	**42.00M KZT**	Sum of spare parts inventory (34.00M KZT) and liquid quick cash/settlement assets (8.00M KZT) [5].
Merchandise Inventory	**34.00M KZT**	Physical stock audit across Koktal 15B hub & Abylai Khan 62 branch (>3,000 GAZelle LCV SKUs) [5].
Quick Assets (Cash & Float)	**8.00M KZT**	Cash on hand, Kaspi Pay next-day settlement float, and liquid balances (42.00M - 34.00M KZT) [5].
Current Liabilities	**18.00M KZT**	30–45 day EAEU supplier trade payables (Planeta Auto & Satis Auto invoices) [5].
Total Liabilities	**22.00M KZT**	Current trade payables (18.00M KZT) + long-term warehouse racking/equipment obligations (4.00M KZT) [5].
Owner's Equity	**28.00M KZT**	Paid-in family capital and retained inventory equity across the 4 operational IPs [5].
Peak Daily Kaspi QR Velocity	**>3.00M KZT/day**	ABPos daily Kaspi QR and counter cash settlement logs during peak commercial fleet repair cycles [5].

Table A2. *Independently Calculated Financial Ratios (Week 8 Verification, OpenStax Ch. 16 [2])*

Category	Financial Ratio	Standard Formula	AB Auto Calculation	Verified Result	Benchmark
Liquidity	**Current Ratio**	Current Assets / Current Liabilities	42.00M / 18.00M	**2.33x**	1.50x – 2.00x
Liquidity	**Acid-Test (Quick)**	(Current Assets - Inventory) / Current Liab.	(42.00M - 34.00M) / 18.00M	**0.44x**	>= 1.00x
Profitability	**Net Profit Margin**	(Net Profit / Net Sales) × 100	(26.88M / 384.00M) × 100	**7.00%**	5.50% – 8.00%
Leverage	**Debt-to-Equity**	Total Liabilities / Owner's Equity	22.00M / 28.00M	**0.79x**	< 1.00x

2. Week 8 Human-vs-AI Financial Discrepancy Audit

Table A3. *Complete Discrepancy Audit Across All Four Financial Ratios (Accept / Correct / Reject Verdicts)*

Ratio & Verified Value	Raw AI Interpretation (GPT-4o)	Audit Status	Root Cause of Discrepancy & Human Domain Verification
Current Ratio 2.33x	*"Comfortable excess liquidity and idle working capital above 2.0x that could be returned to owners."*	**CORRECT** *(Qualify Asset Mix)*	Arithmetic verified (42.0M / 18.0M), but AI misread composition: **80.95%** (34.0M KZT) is physical GAZelle leaf springs, clutches, and brake kits staged at Koktal 15B to hedge 1–3 day EAEU border delays—not idle cash [5].
Acid-Test (Quick) 0.44x	*"Severe liquidity distress (<1.0x): quick assets cover 44% of current debt, signaling imminent bankruptcy and supplier default."*	**REJECT** *(Contextual Blindness)*	**Critical AI diagnostic failure.** Static textbook rules ignore cash-conversion velocity: ABPos logs confirm rapid daily Kaspi QR inflows (**>3.0M KZT/day** on peak fleet days), settling staggered 30–45 day supplier invoices with zero cash gaps [5].
Net Profit Margin 7.00%	*"Thin retail margin (7.0%) vulnerable to 20% corporate income tax, 12% VAT friction, and marketplace discounting."*	**CORRECT** *(Fiscal Regime Fix)*	AI assumed a consolidated TOO general tax burden like Interkom-Auto [6]. AB Auto operates across **4 IPs under Art. 683** (3% Simplified Tax Regime, 0% VAT) and enforces an owner **>=18% gross margin floor**, making 7.0% net margin resilient [3], [5].
Debt-to-Equity 0.79x	*"Moderate, solvent leverage (<1.0x) predominantly composed of operational trade payables rather than bank debt."*	**ACCEPT** *(Retain + Context)*	Core solvency assessment accepted (22.0M / 28.0M = 0.79x). Human audit adds off-balance context: family consumer vehicle loans are legally segregated outside the 4 operational IPs to protect commercial credit capacity [5].

3. Week 9 Career Capability Portfolio Matrix (Applied to AB Auto Model)

Table A4. *Human, Business, Digital, and Meta-Capabilities Mapped Against Week 4 & ABPos Operating Model*

Capability Pillar	Graduate Competency in AB Auto	Link to Week 4 / ABPos Model	Why AI Cannot Substitute It (Durable Value)
1. Human Capabilities	Managing relational B2B trust chains with partnering STO garages, negotiating post-repair credit deferrals, and verbal dual-brand warranty disclosure.	Governs **Human-Only** tasks in Week 4 Matrix: 5–7 year informal STO credit ledgers generating 45% of B2B revenue at Koktal 15B [5].	Algorithms cannot cultivate reciprocal mechanic loyalty or underwrite unrecorded character-based trade credit in Astana's repair economy [1], [5].
2. Business Capabilities	Enforcing the >=18% gross margin floor, cash-velocity liquidity auditing, and balancing statutory turnover caps across 4 IPs under Art. 683.	Anchors **Human + AI** financial control: overriding false 0.44x insolvency alerts and blocking margin-eroding Kaspi price wars [3], [5].	Requires fiduciary accountability before Kazakhstan's State Revenue Committee (Form 910 filings) and commercial banks [1], [3].
3. Digital Capabilities	Supervising ABPos multi-hub SQLite/Supabase sync, EAEU vendor manifest OCR intake, and <60s Kaspi API zero-stock delisting triggers.	Eliminates the **35-minute cross-branch phone bottleneck** between Koktal 15B and Abylai Khan 62 (cutting dispatch from 65m to 11.5m) [5].	Tier-1 corporate ERPs (Interkom-Auto) misfire in 4-IP SMEs; graduates must architect and govern lightweight domain workflows [5], [7].
4. Meta-Capabilities	Epistemic vigilance, algorithmic discrepancy auditing, <85% OCR confidence escalation (2m/5m/15m), and 12-hour offline fallback execution.	Drives Stage 3 Critical Review Gate (<2 min tactile casting-stamp verification) and Week 7 Governance Risk Register [5].	AI lacks metacognitive awareness of contextual blind spots (smudged Cyrillic invoices or informal local norms) and legal personhood [1], [8].

4. Running IEEE Evidence Folder (Cumulative Current to Week 9)
