AI-USE DECLARATION

Capstone Final Exam Portfolio: Strategic Operations Defense

Scaling AB Auto: 4-IP Tax Architecture, ABPos Digitalization & Human–AI Governance

Student details

Student name	**Manat Amir**	**Student ID**	**261434**
Group	**DPA-2602**	**Submission date**	**07.11.2026**
Company A	Interkom-Auto (Corporate TOO, General Tax Regime 12% VAT, >1.3B KZT Taxpayer)	**Company B**	AB Auto (Astana · 4 IPs, Special Tax Regime 3%, Koktal 15B Hub)

AI-Use Level: Level 3 (Designated) for Capstone Portfolio Preparation
Student Responsibility: The student used generative and analytical AI systems (GPT-4o, Google Gemini, Antigravity) under explicit authorization for data synthesis, formula auditing, and structural stress-testing. Every data point, financial ratio, and strategic judgment was independently verified against empirical management accounts. CRITICAL GOVERNANCE CONFIRMATION: The student confirms adherence to LEVEL 1 (ZERO AI ASSISTANCE) for the upcoming live Capstone oral defense, viva questioning, and real-time stress-test examination before the academic jury.

A. Overall AI-use status

☑ **[X] I used one or more AI systems while preparing this Capstone Portfolio. I have documented each use below.**

☐ I did not use any AI system for this assignment. I have completed the integrity confirmations and final declaration only.

If you select "no AI used," do not leave the declaration blank: tick the second box and sign the final declaration.

B. AI systems register

List every AI system used. Add rows if needed.

AI system / model	Provider / version (if known)	Date(s) used	Purpose in this assignment
ChatGPT (GPT-4o)	OpenAI (v. 2026)	28.10–07.11.2026	Tested textbook financial health interpretations on AB Auto's FY2026 ratios; stress-tested potential algorithmic bankruptcy alerts.
Google Gemini	Google DeepMind (Pro / 1.5)	28.10–07.11.2026	Mapped operational logistics workflows to OpenStax Ch. 13/16/17 taxonomy; reviewed academic English phrasing for board consulting deck.
Antigravity	Advanced Agentic Coding (DeepMind)	29.10–07.11.2026	Automated presentation deck (pptx) and report (docx) layout structuring, audited word-count and page limits, and verified cross-hub links.
Microsoft Excel / Python 3.13	Microsoft / PSF	28.10–07.11.2026	Deterministic mathematical recalculation of liquidity ratios, cash velocity logs, and 12-month roadmap budget allocations; zero AI hallucination.

C. Detailed AI activity and verification log

Record each materially different use. The declaration should show not only what the system did, but how you checked it and what you changed, rejected or corrected.

Part of assignment / activity	AI system	What I used AI to do	How I verified the output independently	What I changed, rejected or corrected
1. Strategic Architecture & §1–§9 Taxonomy	Google Gemini & Antigravity	Brainstormed taxonomy alignment across OpenStax Business Administration chapters.	Cross-checked against the official Astana IT University BA2026 Capstone Brief.	Rejected generic corporate consulting jargon; anchored analysis in Astana's local GAZelle logistics realities.
2. Critical Financial Discrepancy Audit	ChatGPT (GPT-4o)	Requested diagnostic evaluation of AB Auto's ratios (Current 2.33x, Acid-Test 0.44x).	Independently verified cash ledger: Kaspi QR generates >3.0M KZT/day; 34M KZT parts turn in <30 days.	REFUTED AI DEFAULT ALERT: Overruled GPT-4o's false bankruptcy diagnosis and rejected price-cutting advice.
3. Four-Zone Task Allocation Matrix	Antigravity & Gemini	Categorized management tasks using Wilson & Daugherty collaborative intelligence model.	Audited daily storekeeper routines at Koktal 15B warehouse and Abylai Khan 62 branch.	Enforced strict Human-Only gate for tactile metal casting checks (<2m) and STO trade credit negotiations.
4. Operations & Bottleneck Lead Time Audit	Antigravity	Calculated lead time improvements between manual baseline and ABPos architecture.	Verified against empirical September 2026 Koktal order logbook (n = 45 B2B orders).	Quantified exact 35-min cross-hub telephone delay; verified 82.3% lead time reduction (65m to 11.5m).
5. Five-Scenario Stress-Test Protocols	ChatGPT (GPT-4o) & Gemini	Brainstormed potential macroeconomic shock scenarios affecting Kazakhstan SMEs.	Evaluated RK Tax Code provisions (Art. 683 vs. Retail Tax 4%) and EAEU customs transit data.	Authored specific mitigation playbooks: 4% retail tax switch, 12h offline failover kit, and supplier buffers.

D. Financial and argumentative verification

☑ [X] The strongest counterarguments (corporate TOO transition, banking robot-scoring) are stated fairly and final transfer verdicts are my own judgment.

Claim / figure / argument	Original evidence or source	Independent check performed	What I changed / retained and why
Baseline lead time: 65.0 min; cross-hub phone bottleneck: ~35 min	Koktal 15B In-Store Counter Order Logbook (Sep 2026, n=45)	Manual audit of handwritten counter slips and phone call duration records.	Retained: Ground truth empirical baseline proving need for ABPos dual-hub sync.
Kaspi Pay QR cash turnover >3.0M KZT/day on peak operating days	ABPos Kaspi Pay POS Merchant Settlement Statements (Oct 2026)	Reconciled bank acquiring settlement statements with physical POS terminal logs.	Retained: Sourced factual liquidity inflow refuting GPT-4o's bankruptcy alert.
Decentralized 4-IP structure under Article 683, RK Tax Code (3% tax)	State Revenue Committee (KGD) Form 910.00 Semi-Annual Filings	Cross-checked statutory turnover ceilings (Law No. 120-VI) with 4-IP revenue splits.	Retained: Critical legal basis proving compliance and 0% VAT exemption.
Strategic buffer inventory valued at 34.0M KZT in critical chassis parts	Koktal 15B Balance Sheet Inventory Asset Register (Q3–Q4 2026)	Physical warehouse count of GAZelle leaf springs, clutch kits, and transmissions.	Retained: Proves buffer absorbs 1–3 day EAEU border customs variance.
Comparator Interkom-Auto: Corporate TOO paying >1.3B KZT annual taxes	Interkom-Auto official public corporate registry & interkom.kz disclosures	Verified state revenue taxpayer classification (12% VAT + 20% CIT General Regime).	Retained: Contrasts corporate overhead against agile SME decentralized structure.

E. Counterargument integrity check

☑ [X] The strongest counterarguments (corporate TOO transition, banking robot-scoring) are stated fairly and final transfer verdicts are my own judgment.

_____

_____

☑ [X] The strongest counterarguments (corporate TOO transition, banking robot-scoring) are stated fairly and final transfer verdicts are my own judgment.

_____

_____

F. Week 8 quantitative evidence verification

Ratio / financial figure used	My own calculation / source	AI-supported interpretation (if any)	Discrepancy found and how resolved
Acid-Test (Quick) Ratio: 0.44x (8.0M Cash / 18.0M Liabilities)	Computed from Q3–Q4 2026 management accounts: Cash 8.0M KZT / Current Liabilities 18.0M KZT.	GPT-4o diagnosed 'acute default risk, imminent bankruptcy, urgent inventory liquidation required.'	RESOLVED & REFUTED: GPT-4o ignored Kaspi QR cash turnover (>3M KZT/day) and 30-day buffer liquidity. Overruled price cuts to protect 18% margin floor.
Net Profit Margin: 7.00% (26.88M Net Profit / 384.0M Sales)	Verified from 4-IP aggregated P&L statements: 384.0M gross sales, 26.88M net profit.	AI models initially projected lower retail margins (3–4%) assuming standard 12% VAT deductions.	RESOLVED: Corrected fiscal parameters to reflect 3% Simplified Tax Regime (Art. 683), confirming 7.00% net margin.
Current Ratio: 2.33x (42.0M Assets / 18.0M Liabilities)	Verified from balance sheet: Cash 8.0M + Buffer Inventory 34.0M = 42.0M Assets vs 18.0M Payables.	AI confirmed ratio >2.0x standard, but failed to connect high inventory to supply chain border delays.	RESOLVED: Retained 2.33x calculation; contextualized 34.0M inventory as essential buffer absorbing EAEU border variance.

G. Authorship and judgment reflection

One AI suggestion or line of reasoning I rejected or materially revised, and why:

_____

_____

One point where verification changed my position or qualified my conclusion:

_____

_____

The condition under which I would change my mind, and how I reached it:

_____

_____

H. Assignment-specific confirmations

☑ [X] All financial figures and ratios (Current 2.33x, Acid-Test 0.44x, Net Margin 7.00%, D/E 0.79x) come from verified management accounts and have been independently verified.

☑ [X] The strongest counterarguments (corporate TOO transition, banking robot-scoring) are stated fairly and final transfer verdicts are my own judgment.

☑ [X] My strategic recommendations are grounded in AB Auto vs. Interkom-Auto empirical benchmarking and Kazakhstan's regulatory context.

☑ [X] My final Capstone report and presentation are authored by me; every cited source is verifiable in the accompanying Evidence Dossier.

Final declaration

I declare that this form accurately records my AI use for this assignment. I independently verified the claims, numbers and sources for which I remain accountable, and I authored the final analysis and judgment submitted for assessment. Any AI support listed above was used only as disclosed in this form.

- [X] I confirm that every AI system I used is transparently listed in this declaration.
- [X] I confirm that I did not fabricate, invent or knowingly submit unverifiable data, claims or references.
- [X] I confirm that I did not upload the OpenStax textbook or the course core text to any commercial AI system.
